The price to acquire the product listed may differ from the WAC price listed. How much a patient will pay will depend on the patient’s insurance coverage. To find out the exact cost of a prescription, patients should contact their health insurance company.

Colorado law also requires manufacturers to provide the names of generic prescription drugs from the same “therapeutic class” as the marketed products. Colorado defines “therapeutic class” as “a group of similar drugs that have the same or similar mechanisms of action and are used to treat a specific condition.” There are currently no generic prescription drugs in the same “therapeutic class” (based on the definition of “therapeutic class” under Colorado law) as the listed argenx product.
